

UNCC School of Architecture  
Spring 2021 Lecture Series

spring

**/theme**

The focus of this year's lecture series and colloquia is diversity and inclusion—an examination of culture and social justice that is both timely and timeless. Our lecturers include practitioners of color and others who work at the scale of urban planning, architecture, installation art and graphic design. Their contributions to the profession are both provocative and uplifting. All talks will be open to the public via Zoom and will also be available for future viewing on the School website.
